## PROFILE

---

Passionate BSC.IT graduate skilled in Full-Stack Development, proficient in HTML, CSS, JavaScript, MySQL, Python, Django, and basic AWS. Committed to innovation and growth, dedicated to developing creative solutions and optimizing user interactions for impactful contributions.

## SKILLS

---

### Database

- MySQL

### Languages

- Python
- SQL

### AWS

- S3 Storage
- Basic Networking Configurations

### Front End Technologies

- HTML
- CSS
- Javascript

### Framework

- Django

### Version Control

- Github

### Front End Framework

- Bootstrap

### Editor Tools

- VSCode
- PyCharm
- Jupyter Notebook

## PROJECTS

---

### Personal Portfolio Website

*Technologies used:- Html,Css,Javascript*

- Created a personal portfolio website with HTML, CSS, and JavaScript.
- Showcased professional profile, skills, and project achievements.
- Designed an interactive platform for easy exploration by potential employers and collaborators.
- Ensured user-friendly experience to effectively highlight qualifications and work.

### Online Food Ordering System

*Technologies used:- MYSQL,SQL*

- Engineered a MySQL-backed online food ordering system, proficient in managing customer profiles, restaurant data, menu items, and payment processing.
- Ensured a seamless user experience through robust database management, enabling efficient order placement and processing.

### Django E-Commerce Project

*Technologies used:- Html,Css,Javascript,Bootstrap5,Python,Django*

- Developed a robust e-commerce platform with Django, integrating user authentication, product display, and simplified checkout for dairy sales.
- Employed Django, Python, HTML/CSS, JavaScript, and Bootstrap to create a flexible tech stack.
- Ensured secure payments through seamless integration of Stripe API, enhancing user experience and transaction security.
